

Not Your Mother's Hysterectomy

Our mothers got the standard treatment of the day. But would you expect the same surgery, more than two decades later?

There's little reason to undergo an invasive abdominal hysterectomy anymore. Proven new procedures can address many uterine health issues using just two tiny incisions in the naval and bikini area. These minimally invasive hysterectomies mean shorter hospital stays, and considerably less pain, scarring and recovery time.

Thanks to the specialized physicians in Women's Care, women in Northeast Wisconsin have access to these progressive options right here at Prevea Health.

For more information or to schedule an appointment, call (920) 496-4700 or (888) 2PREVEA or visit www.prevea.com and click on Medical Specialties.
